

When your needs are nothing short of heavy duty the only chain to rely on is Super Series from Tsubaki. Super Series chain offers consistent reliability under countless operating conditions that demand higher performance ratings and pose their own unique chain size requirements. Other manufacturers offer “heavy duty” chain, but none can match Tsubaki’s complete line of Super Series chain. Because here at Tsubaki, we don’t just bring you close to a century of experience, we bring you the Tsubaki Advantage: reliable premium products that don’t just perform, they outperform the competition. All the while saving you money. For more information on how you can lower your costs and increase productivity with the Tsubaki Super Series line of chain,

call us at 800-263-7088.

**A wide range of Super Series Chain means
a wide range of heavy duty solutions.**

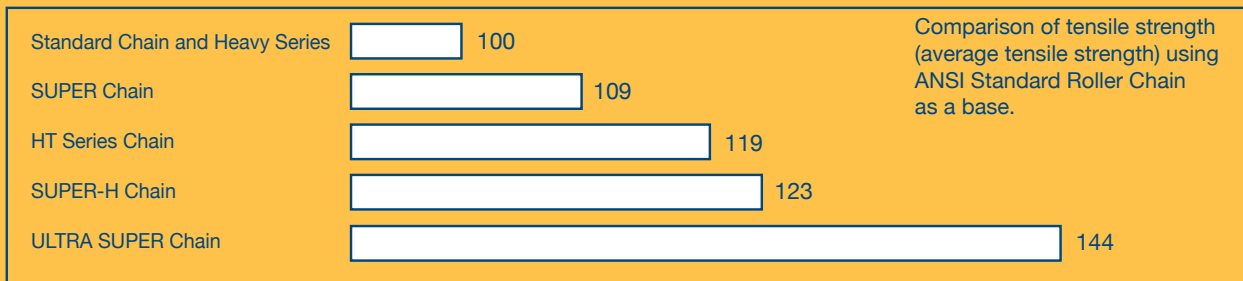

THE STRONGEST LINK in the PERFORMANCE CHAIN

Time is money. You can't afford to be down due to a broken chain. And you can't afford to not consider Tsubaki Super Series Chains. These are designed to meet the growing demand for greater performance and are the right choice for applications that require higher horsepower ratings, maximum allowable load and tensile strength. Features of these chains include:

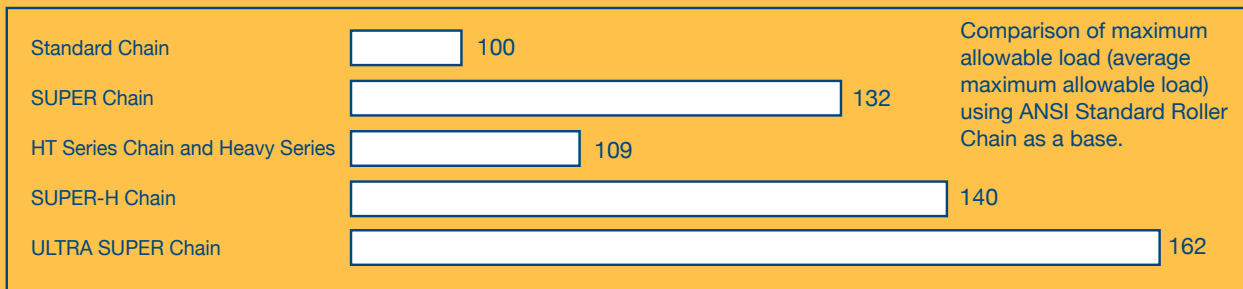

- Severe operating conditions such as heavy shock loads.
- Where space to put a chain is limited. A Super Series Chain will often deliver the same tensile strength of a larger size of standard ANSI roller chain.
- All chains have through hardened pins for greater shock resistance.

Comparison of Tensile Strength and Maximum Allowable Load
